Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim 3 is objected to because the phrase " internal motion generator " lacks proper antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Mabuchi (4,513,737).

As for claim 3, Mabuchi teaches every claimed feature of claim 3 including a handheld device comprising internal motion generating structure 20, 21, 17, 19, 3 for imparting desired motion to a distal treatment component 6 at a distal tip 4, 4A (figures 1, 10) thereof, and a distal tip surface 4, 4A (figure 10) having a connection element 30, 32 (figure 10) for connecting the treatment component 6 with the distal tip 4, 4A,

Art Unit: 3764

and an actuable motion generator 20 and control element; the treatment component 6 having a first portion designed for connection with a motion generating subsystem 3,19,17 of the internal motion generator 20 through the connection element, and a second portion 8,7 having a shaped configuration and a first and second surface, wherein the second portion is configured so that the first surface will contact the skin and is capable of imparting desired motion to the skin for a predetermined length of time and in accordance with a selected program to facilitate rejuvenation of the skin. As for claims 1 and 2, Mabuchi teaches every claimed steps including the steps of : assessing the skin to be rejuvenated; and selecting a proper program for a chosen treatment paddle, which is one of a variety of treatment paddles (figures 21A- 22C) or components selectively attachable to a handheld device; the handheld device having an internal motion mechanism 20, 3, 19, 17, 21 for imparting desired motion to the chosen treatment paddle for a predetermined length of time and in accordance with the selected program, wherein the paddle is chosen so that it is configured to impart mechanical motion to the skin to be rejuvenated so that a tissue generation cascade is initiated or facilitated at the dermis of the skin.

Claims 1-3 are rejected under 35 U.S.C. 102(a) or 102 (e) as being clearly anticipated by Zelickson et al (6,645,184).

It is noted that the patent to Zelickson et al (6,645,184) has different inventor group, and the patent to Zelickson et al teaches every claimed feature and steps of claims 1-3.

The foreign documents listed on form 1449 (filed on 7/5/2005) have not been considered because the examiner does not have a copy of these documents.
